Re: November 9, 2000 E911 Phase TT Carrier Implementation Report

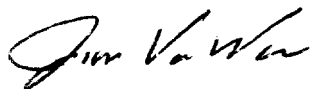

Mr. Sugrue:

I received your letter dated December 27, 2000, on January 2, 2001. Your letter made reference to our two way radio call sign "WNAE 475". This is a UHF two way radio system that we use to dispatch our own employees. This system had a phone patch which has been discontinued. The system no longer has access to E911 trunks, or in fact access to any dial tone whatsoever. Because our two way radio system no longer has E911 access I was unaware that we needed to file in accordance with section 308(b) of the Communications Act of 1934, as amended, 47 U.S.C. 308(b).

As stated above, since we have no access to E911 services, I felt that we DID NOT have to file any implementation reports in this regard.

If you have any further questions, or if there is something else I should do, please advise.

Yours in telecommunications,

Jim Van Waus- General Manager
